About

Throughout my decade-long career, I have contributed to the development of applications across diverse domains, ranging from basic business card websites to high-traffic applications catering to millions of users.

I am proud to highlight the following key accomplishments:

- Attainment of all available achievements in Google Cloud, including recognition from the company in the form of merchandise
- Successful integration with the APIs of leading services such as Google, Facebook, and Amazon
- Integration of over 20 different payment systems

Skills

Languages	PHP, Lua, C#, C, C++, SQL, Cypher, Pascal, Assembler, JavaScript
Frameworks	Laravel, Symfony, Yii, Drupal
DB	MySQL, Redis, Neo4j, Postgres, DynamoDB
Web	jQuery, D3, Ajax, CSS, HTML, Bootstrap
Other	Git, Github Actions, Jenkins, TeamCity, ArgoCD, Docker, Kubernetes, Elasticsearch, Jaeger, Swagger, Grafana, Datadog, Google Cloud, Amazon Drive

Experience

airSlate Poland Sp. z o.o (Wroclaw, Poland)

03/2023 – Now

airSlate Inc. (Kyiv, Ukraine)

07/2019 – 03/2023

Upon joining the company, I was involved in implementing CI/CD, dockerization, Kubernetes, and platform updates. My core responsibilities entailed feature development, bug resolution, cost optimization, library development, and integrating new and existing APIs (e.g., Amazon, Google). Additionally, I focused on reducing script execution time, optimizing DB structure and queries, metrics integration, and test writing.

My notable achievements include:

- Successful upgrade of PHP from version 7.0 to 8.0
 - 20% reduction in inter-service traffic
 - 5% reduction in code base
 - Support or modification of at least 25 company repositories
-

- 4% reduction in DB capacity and table count

Smiles. Education LLC (*Kyiv, Ukraine*)

09/2015 – 07/2019

In my previous role, I was responsible for communicating with project managers and bringing their ideas to life. These projects mainly involved creating websites for exhibitions and conferences using pre-designed layouts. I also handled the integration of different payment systems to accommodate various currencies.

In addition to these tasks, I was in charge of fixing bugs and adding new features to the existing admin panel. I also spearheaded the development of an employee management system to monitor office visitation statistics, track working hours, and provide access to relevant information.

Some of my notable achievements include:

- Completing over 50 projects
 - Seamlessly integrating with APIs of prominent services like Facebook, Twitter, etc.
 - Integrating more than 20 different payment systems
 - Migrating content from one CMS to an alternative framework
-

Freelance (*Donetsk, Ukraine*)

09/2013 – 05/2015

My freelance responsibilities included finding orders and completing turnkey projects. This entailed direct engagement with clients, overseeing the entire process from design to the implementation of micro markup, and the installation of SSL certificates. The scope of the projects varied, ranging from smaller initiatives like the development of the “Дубровка” (“Dubrovka”) recreation center website and the "InVega" educational platform to larger-scale such as the creation of the online bag store "Skyle" and of the website for the "[Legal Alliance](#)" law firm.

Education
